

Health and safety initiatives

GRI 102-56, 403-1~10

Placing health and safety above all else

As a corporate group conducting global business, creating safe, healthy workplaces for our employees and all other personnel working on our premises is crucial at all of our sites.

Based on the core principle that placing health and safety above all is the foundation of value creation in a company, Aisin continually strives to enhance the health and safety of all employees.

Aisin Safety and Health Policy

In order to realize the Aisin philosophy of Inspiring "Movement," Creating Tomorrow, we take the views of "Be proactive, make change," "Raise individuals, expand dreams" and "Advance, build the future," with health and safety at the forefront of all of our business activities and day-to-day actions.

1. Implement activities to protect yourself and others through positive communication that involves everyone.
2. Endeavor to improve the safety and health of personnel through training and awareness-raising.
3. In addition to compliance with the laws and regulations of each country, establish voluntary standards to create comfortable working environments.
4. Prioritize health and safety above all else, thoroughly eliminate sources of danger and harm, and aim for zero accidents.
5. Invest appropriate management resources into establishing and maintaining a system for ongoing improvement and management to meet targets.
6. Share information with governments, customers, local communities, suppliers and our sites, as well as facilitating cooperation between our domestic and overseas sites, for efficient operations.
7. Make this policy known to all the employees in our business sites around the world and actively disclose information.

Road to zero accidents

To create working environments where all workers make health and safety the number one priority and can work with peace of mind
